

# **Personal Data Protection Policy**

## **Hudson and Thames Quantitative Research**

We at Hudson and Thames Quantitative Research are committed to processing personal data securely and respecting privacy of the concerned individuals.

Version No. and date of the last update:	v. 1.0. 06/29/2021
Approved by:	Jacques Francois Joubert, CEO of Hudson and Thames Quantitative Research
This policy shall be reviewed annually or each time when the changes in our data processing occur.

## 1. Scope and Definitions

- 1.1. **Scope.** This Personal Data Protection Policy (the “**Policy**”) describes Hudson and Thames Quantitative Research internal rules for personal data processing and protection. The Policy applies to all Hudson and Thames Quantitative Research group entities, including Hudson and Thames Quantitative Research and all other subsidiaries of the group, employees and contractors of the entities (“**we**”, “**us**”, “**our**”, “**Hudson and Thames Quantitative Research**”). The management of each entity is ultimately responsible for the implementation of this policy, as well as to ensure, at entity level, there are adequate and effective procedures in place for its implementation and ongoing monitoring of its

adherence. For the purposes of this Policy, employees and contractors are jointly referred to as the “**employees**”.

- 1.2. **Privacy Manager**. Privacy Manager is an employee of Hudson and Thames Quantitative Research responsible for personal data protection compliance within Hudson and Thames Quantitative Research (the “**Privacy Manager**”). The Privacy Manager is in charge of performing the obligations imposed by this Policy and supervising other employees, who subject to this Policy, regarding their adherence to this Policy. The Privacy Manager must be involved in all projects at an early stage in order to take personal data protection aspects into account as early as the planning phase.

The designated Privacy Manager at Hudson and Thames Quantitative Research is Jacques Francois Joubert.

1.3. **Definitions**.

<b>Competent Supervisory Authority</b>	means a public authority that is responsible for regulating and supervising personal data protection with regards to activities of Hudson and Thames Quantitative Research.
<b>Data Breach</b>	means a breach of the security and/or confidentiality leading to the accidental or unlawful destruction, loss, alteration, unauthorized disclosure of, or access to Personal Data transmitted, stored or otherwise processed. This includes but is not limited to e-mails sent to an incorrect or disclosed list of recipients, an unlawful publication of the Personal Data, loss or theft of physical records, and unauthorized access to personal information.
<b>Data Controller</b>	means the natural or legal person, public authority, agency or other body which, alone or jointly with others, determines (make a decision) the purposes and means of the processing of Personal Data.
<b>Data Processor</b>	means a natural or legal person, public authority, agency or other body which processes the Personal Data on behalf of the data controller.
<b>Data Protection Laws</b>	mean any laws and legal rules on personal data use and protection applicable to the activities of Hudson and Thames Quantitative Research, including, but not limited to the Regulation (EU) 2016/679 of the European Parliament and of the Council of April 27, 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive

	95/46/EC (General Data Protection Regulation, GDPR).
<b>Data Subject Request (DSR)</b>	means any request from the Data Subject and concerning their personal data and/or data subject rights.
<b>Data Subject</b>	means a natural person, whose Personal Data we process. Data Subjects include but are not limited to users, website visitors, employees, contractors, and partners of Hudson and Thames Quantitative Research.
<b>Personal Data</b>	means any information relating to an identified or identifiable Data Subject; a Data Subject can be identified by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or the combination of factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that Data Subject.
<b>Processing</b>	means any operation or set of operations which is performed by Hudson and Thames Quantitative Research on Personal Data, such as collection, recording, organization, structuring, storage, adaptation or alteration, retrieval, consultation, use, disclosure by transmission, dissemination or otherwise making available, alignment or combination, restriction, erasure or destruction.
<b>Standard Contractual Clauses</b>	means the European Commission Decision of February, 5 2010 on standard contractual clauses for the transfer of personal data to processors established in third countries under Directive 95/46/EC of the European Parliament and of the Council (2010/87/EU).
<b>Third Party</b>	means a natural or legal person, who accesses the Personal Data for further processing and is not an employee, member or corporate affiliate of Hudson and Thames Quantitative Research. This definition does not apply to natural persons, who provide services to Hudson and Thames Quantitative Research as contractors on a regular basis.
<b>User</b>	means a Data Subject who uses our services provided on Hudson and Thames Quantitative Research website.

## 2. Data Processing Principles

- 2.1. Hudson and Thames Quantitative Research's processing activities must be in line with the principles specified in this Section. The Privacy Manager must make sure that Hudson and Thames Quantitative Research's compliance documentation, as well as data processing activities, are compliant with the data protection principles.
- 2.2. We must process the Personal Data in accordance with the following principles:
- 2.2.1. Lawfully, fairly and in a transparent manner (**lawfulness, fairness and transparency**). We shall always have a legal ground for the processing (described in Section 3 of this Policy), collect the amount of data adequate to the purpose and legal grounds, and we make sure the Data Subjects are aware of the processing;
- 2.2.2. Collected for specified, explicit and legitimate purposes and not further processed in a manner that is incompatible with those purposes (**purpose limitation**). We must not process the Personal Data for the purposes not specified in our compliance documentation without obtaining specific approval of the Privacy Manager;
- 2.2.3. Adequate, relevant and limited to what is necessary for the purposes for which they are processed (**data minimization**). We always make sure the data we collect is not excessive and limited by the strict necessity;
- 2.2.4. Accurate and, where necessary, kept up to date (**accuracy**). We endeavor to delete inaccurate or false data about Data Subjects and make sure we update the data. Data Subjects can ask us for a correction of the Personal Data;
- 2.2.5. Kept in a form which permits identification of Data Subjects for no longer than is necessary for the purposes for which the Personal Data are processed (**storage period limitation**). The storage periods must be limited as prescribed by Data Protection Laws and this Policy; and
- 2.2.6. Process in a manner that ensures appropriate security of the Personal Data, including protection against unauthorized or unlawful processing and accidental loss, destruction or damage, using appropriate technical or organizational measures (**confidentiality, integrity, and availability**).
- 2.3. **Accountability**.
- 2.3.1. We shall be able to demonstrate our compliance with Data Protection Laws (**accountability principle**). In particular, we must ensure and document all relevant procedures, efforts, internal and external consultations on personal data protection including:
- the fact of appointing a person responsible for Hudson and Thames Quantitative Research's data protection compliance;
  - where necessary, a record of a Data Processing Impact Assessment;
  - developed and implemented notices, policies, and procedures, such as

- Privacy Notice, this policy or Data Breach response procedure;
  - the fact of staff training on compliance with Data Protection laws; and
  - assessment, implementation, and testing organizational and technical data protection measures.
- 2.3.2. The Privacy Manager must maintain Hudson and Thames Quantitative Research's Records of processing activities, which is an accountability document that describes personal data processing activities of Hudson and Thames Quantitative Research, prepared in accordance with Art. 30 of the GDPR (the "**Records of processing activities**"). The Records of processing activities must maintain, at least, the following information about each processing activity:
- contact details of Hudson and Thames Quantitative Research, the EU Representative, and, where applicable, of the Data Protection Officer;
  - name of the activity, its purposes and legal basis along with, where applicable, the legitimate interests of Hudson and Thames Quantitative Research;
  - data subjects and personal data categories concerned;
  - data retention periods;
  - general description of applicable security measures;
  - recipients, including joint controllers, processors, and contractors involved, as well as the fact of the international data transfer with the safeguards applied to the transfer;
  - where applicable, a reference to the Data Processing Impact Assessment;
  - where applicable, a reference to the record of the data breach occurred involving the personal data;
  - if Hudson and Thames Quantitative Research acts as a data processor, the information to be provided includes the names and contact details of controllers, name and contact details of controller's representative (if applicable), categories of processing (activities), names of third countries or international organizations that personal data are transferred to (if applicable), safeguards for exceptional transfers of personal data to third countries or international organizations (if applicable), and general description of technical and organizational security measures.

### **3. Access to Personal Data. Legal Grounds and Purposes**

#### **3.1. Legal grounds.**

- 3.1.1. Each processing activity must have one of the lawful grounds specified in this Section to process the Personal Data. If we do not have any of the described, we cannot collect or further process the Personal Data.
- 3.1.2. If Hudson and Thames Quantitative Research is intended to use personal data for other purposes than those specified in the Records of processing activities, the Privacy Manager must evaluate, determine, and, if necessary, collect/record the appropriate legal basis for it.

- 3.1.3. **Performance of the contract.** Where Hudson and Thames Quantitative Research has a contract with the Data Subject, e.g. website's Terms of Use or the employment contract, and the contract requires the provision of personal data from the Data Subject, the applicable legal ground will be the performance of the contract.
- 3.1.4. **Consent.** To process the personal data based on the consent, we must obtain the consent before the Processing and keep the evidence of the consent with the records of Data Subject's Personal Data. The Privacy Manager must make sure that the consent collected from Data Subjects meet the requirements of Data Protection Laws and this Policy. In particular, the Privacy Manager must make sure that:
- the Data Subject must be free to give or refuse to give consent.
  - the consent is in the form of an active indication from the Data Subject, i.e., the consent checkbox must not be pre-ticked for the user.
  - the request for the consent clearly articulates the purposes of the processing, and other information specified in Subsection 6.2 is available to the Data Subject.
  - the Data Subject must be free to give one's consent or to revoke it.
- 3.1.5. **Legitimate interests.** We have the right to use personal data in our 'legitimate interests'. The interests can include the purposes that are justified by the nature of our business activities, such as the marketing analysis of personal data. For Hudson and Thames Quantitative Research to use legitimate interests as a legal ground for the processing, the Privacy Manager must make sure that:
- the legitimate interest in the processing is clearly defined and recorded in the Records of processing activities;
  - any envisaged risks to Data Subject rights and interests are spotted. The examples of the risks can be found in Subsection 7.2.;
  - the Data Subjects have reasonable expectations about the processing, and additional protective measures to address the risks are taken;
  - subject to the conditions of Subsection 6.7 (Right to object against the processing), the Data Subject is provided with the opportunity to opt-out from the processing for the described legitimate interests.
- If at least one of the above conditions is not met by Hudson and Thames Quantitative Research, the Privacy Manager must choose and propose a different legal ground for the processing, such as consent.
- 3.1.6. **Legal Compliance and Public Interest.** Besides the grounds specified afore, we might be requested by the laws of the European Union or laws of the EU Member State to process Personal Data of our Users. For example, we can be required to collect, analyze, and monitor the information of Users to comply with financial or labor laws.
- Whenever we have such an obligation, we must make sure that:
- we process personal data strictly in accordance with relevant legal requirements;
  - we do not use or store the collected Personal Data for other purposes than

- legal compliance; and
- the Data Subjects are properly and timely informed about our obligations, scope, and conditions of personal data processing.

**Important:** Where Hudson and Thames Quantitative Research has the law requirements of another country to process personal data, the Privacy Manager must propose using another legal ground for the processing under Data Protection Laws, such as legitimate interests or consent.

### 3.2. **Access to Personal Data.**

- 3.2.1. The employees must have access to the personal data on a “need-to-know” basis. The data can be accessed only if it is strictly necessary to perform one of the activities specified in the Records of processing activities. The employees and contractors shall have access to the Personal Data only if they have the necessary credentials for it.
- 3.2.2. Heads of the departments within Hudson and Thames Quantitative Research are responsible for their employees’ access and processing of personal data. The heads must maintain the list of employees that are entitled to access and process personal data. The Privacy Manager shall have the right to review the list and, where necessary, request the amendments to meet the requirements of this Policy.
- 3.2.3. Heads of the departments within Hudson and Thames Quantitative Research must ensure that the employees under their supervision are aware of the Data Protection Laws and comply with the rules set in this Policy. To make sure our employees are able to comply with the data protection requirements, we must provide them with adequate data protection training.
- 3.2.4. All employees accessing personal data shall keep strict confidentiality regarding the data they access. The employees that access personal data must use only those means (software, premises, etc.) for the processing that were prescribed by Hudson and Thames Quantitative Research. The data must not be disclosed or otherwise made available out of the management instructions.
- 3.2.5. The employees within their competence must assist Hudson and Thames Quantitative Research’s representatives, including the Privacy Manager, in any efforts regarding compliance with Data Protection Laws and/or this Policy.
- 3.2.6. When an employee detects or believes there is suspicious activity, data breach, non-compliance with Data Protection Laws and/or this Policy, or a DSR was not routed to the competent department within Hudson and Thames Quantitative Research, the employee must report such activity to the Privacy Manager.
- 3.2.7. Employees that are unsure about whether they can legitimately process or disclose Personal Data must seek advice from the Privacy Manager before taking any action.
- 3.2.8. Any occasional access to personal data for activities not specified in the Records of processing activities is prohibited. If there is a strict necessity for immediate access, the Privacy Manager must approve the access first.

## 4. Third Parties

- 4.1. Before sharing personal data with any person outside of Hudson and Thames Quantitative Research, the Privacy Manager must ensure that this Third Party has an adequate data protection level and provide sufficient data protection guarantees in accordance with Data Protection Laws, including, but not limited to the processorship requirements (Art. 28 of the GDPR) and international transfers compliance (Section 5 of the GDPR). Where necessary, the Privacy Manager must make sure that Hudson and Thames Quantitative Research enters into the appropriate data protection contract with the third party.
- 4.2. An employee can share personal data with third parties only if and to the extent that was directly prescribed by the manager and specified in the Records of processing activities.
- 4.3. If we are required to delete, change, or stop the processing of the Personal Data, we must ensure that the Third Parties, with whom we shared the Personal Data, will fulfill these obligations accordingly.
- 4.4. Whenever Hudson and Thames Quantitative Research is engaged as a data processor on behalf of another entity, the Privacy Manager must make sure Hudson and Thames Quantitative Research complies with the processorship obligation. In particular, the appropriate data processing agreement in accordance with the Data Protection Laws must be in place. The Privacy Manager must supervise the compliance with data processing instructions from the controller, including regarding the scope of processing activities, involvement of sub-processors, international transfers, storage, and further disposal of processed personal data. The personal data processed under the processor role must not be processed for any other purposes than specified in the relevant instructions, agreement or other legal act regulating the relationships with the controller.

## 5. International Transfers

- 5.1. If we have the employees, contractors, corporate affiliates, or Data Processors outside of the EEA, and we transfer Personal Data to them for the processing, the Privacy Manager must make sure Hudson and Thames Quantitative Research takes all necessary and appropriate safeguards in accordance with Data Protection Laws.
- 5.2. The Privacy Manager must assess the safeguards available and propose to the Hudson and Thames Quantitative Research's management the appropriate safeguard for each international transfer. The following regimes apply to the

transfers of Personal Data outside of the EU:

- where the European Commission decides that the country has an adequate level of personal data protection, the transfer does not require taking additional safeguards. The full list of adequate jurisdictions can be found on the relevant page of the European Commission's website<sup>1</sup>.
- to transfer Personal Data to our contractors or partners (Data Processors or Controllers) in other third countries, we must conclude Standard Contractual Clauses with that party. The draft version along with the guidance can be found on the relevant page of the European Commission's website<sup>2</sup>;
- if we have a corporate affiliate or an entity in other countries, we may choose to adopt Binding Corporate Rules in accordance with Article 47 of the GDPR or an approved code of conduct pursuant to Article 40 of the GDPR;
- we also can transfer Personal Data to entities that have an approved certification in accordance with Article 42 of the GDPR, which certifies an appropriate level of company's data protection.

5.3. As a part of the information obligations, Hudson and Thames Quantitative Research must inform the Data Subjects that their Personal Data is being transferred to other countries, as well as provide them with the information about the safeguards used for the transfer. The information obligation is to be performed in accordance with Subsection 6.2.

5.4. In the exceptional cases (the "**Derogation**"), where we cannot apply the safeguards mentioned afore and we need to transfer Personal Data, we must take an explicit consent (active statement) from the Data Subject or it must be strictly necessary for the performance of the contract between us and the Data Subject, or other derogation conditions apply in accordance with the Data Protection Laws. The Privacy Manager must pre-approve any Derogation transfers and document the approved Derogations, as well as the rationale for them.

## 6. Rights of Data Subjects

### 6.1. Our Responsibilities.

6.1.1. Privacy Manager is ultimately responsible for handling all DSR received by Hudson and Thames Quantitative Research. In the case of receiving any outstanding or unusual DSR, the employee must seek advice from the Privacy Manager before taking any action.

6.1.2. Tech Support within Hudson and Thames Quantitative Research is responsible for handling DSRs from Hudson and Thames Quantitative Research Users on a daily basis. The Human Resources department is responsible for handling the

<sup>2</sup> [https://ec.europa.eu/info/law/law-topic/data-protection/international-dimension-data-protection/standard-contractual-clauses-scc\\_en](https://ec.europa.eu/info/law/law-topic/data-protection/international-dimension-data-protection/standard-contractual-clauses-scc_en);

DSR from Hudson and Thames Quantitative Research employees.

- 6.1.3. All DSRs from the Users must be addressed at and answered from the following e-mail address: research@hudsonthames.org. DSR from the employees can be addressed directly to the HR manager or at research@hudsonthames.org.
- 6.1.4. The responsible employee must answer to the DSR within one (1) month from receiving the request. If complying with the DSR takes more than one month in time, the responsible employee must seek advice from the Privacy Manager and, where necessary, inform the Data Subject about the prolongation of the response term for up to two (2) additional months.
- 6.1.5. The responsible employee must analyze the received DSR for the following criteria:
  - **Data Subject identification.** Before considering the DSR content, the responsible employee must make sure the Data Subject is the same person he/she claims to be. For this purpose, the connection between the personal data records and the data subject must be established.

The following methods must be used for this: check of the email address of the Data Subject – generally, the email address should be the same that Hudson and Thames Quantitative Research has about the user in question; if the email address is different from the record in the database, the Privacy Manager must be consulted, upon the approval of which the responsible employee can request additional details from the account for the identification, such as date of birth, the address, and email address.

If the Data Subject failed to undergo the verification, the Privacy Manager must refuse to perform the request and inform the Data Subject about it without undue delay, but no later than within one (1) month from receiving the request.
  - **Personal data.** The responsible employee must check whether Hudson and Thames Quantitative Research has access to the personal data requested. If Hudson and Thames Quantitative Research does not have the personal data under the control, the responsible employee must inform the Data Subject, and, if possible, instruct on the further steps on how to access the data in question;
  - **Content of the request.** Depending on the content of the DSR, the responsible employee must define the type of the request and check whether it meets the conditions prescribed by this Policy and Data Protection Laws. The types of requests and the respective conditions for each of them can be consulted in Subsections 6.3-6.9. If the request does not meet the described criteria, the responsible employee must refuse to comply with the DSR and inform the Data Subject about the reasons for refusing;
  - **Free of charge.** Generally, all requests of Data Subjects and exercises of their rights are free of charge. If the responsible employee finds that the Data Subject exercises the rights in an excessive or unfounded way (e.g., intended to harm or interrupt Hudson and Thames Quantitative Research's business activities), the employee must seek the advice from the Privacy Manager,

and, upon receiving of the latter, may either charge the Data Subject a reasonable fee or refuse to comply with the request;

- **Documenting.** Whenever Hudson and Thames Quantitative Research receives the DSR, the Privacy Manager must make sure that the data and time, Data Subject, type of the request and the decision made regarding it are well documented. In the case of refusing to comply with the request, the reasons for refusing must be documented as well;
- **Recipients.** When addressing the DSR, the Privacy Manager must make sure that all concerned recipients were informed the necessary actions were taken.

6.2. **The right to be informed.**

6.2.1. Hudson and Thames Quantitative Research must notify each Data Subject about the collection and further processing of the Personal Data.

6.2.2. The information to be provided includes: the name and contact details of Hudson and Thames Quantitative Research; generic purposes of and the lawful basis for the data collection and further processing; categories of Personal Data collected; recipients/categories of recipients; retention periods; information about data subject rights, including the right to complain to the competent Supervisory Authority; the consequences of the cases where the data is necessary for the contract performance and the Data Subject does not provide the required data; details of the safeguards where personal data is transferred outside the EEA; and any third-party source of the personal data, without specification for the particular case (except if we receive the direct request from the Data Subject).

6.2.3. The Users must be informed by the Privacy Policy accessible at Hudson and Thames Quantitative Research's website and provided during the user registration. The employees and contractors must be informed by a standalone employee privacy statement, which explains the details described in p. 6.2.2 in a case-based manner, describing the particular purposes and activities.

6.2.4. Hudson and Thames Quantitative Research must inform Data Subjects about data processing, including any new processing activity introduced at Hudson and Thames Quantitative Research within the following term:

- if personal data is collected from the data subject directly, the data subject must be informed at the time we collect Personal Data from the Data Subjects by showing the Data Subject our privacy statement;
- if the personal data is collected from other sources: (a) within one month from collecting it; (b) if the personal data are to be used for communication with the data subject, at the latest at the time of the first communication to that data subject; or (c) if a disclosure to another recipient is envisaged, at the latest when the personal data are first disclosed.
- upon the request of the Data Subject; and
- within one (1) month after any change of our personal data practices, change of the controller of Personal Data or after significant changes in our privacy statements.

6.3. **The right to access the information.**

6.3.1. The Data Subject must be provided only with those personal data records specified in the request. If the Data Subject requests access to all personal data concerning her or him, the employee must seek advice from the Privacy Manager first, to make sure all personal data of the Data Subject is mapped and provided.

6.3.2. A Data Subject has the right to:

- learn if we process the Data Subject's Personal Data;
- obtain disclosure regarding aspects of the processing, including detailed and case-specific information on purposes, categories of Personal Data, recipients/categories of recipients, retention periods, information about one's rights, details of the relevant safeguards where personal data is transferred outside the EEA, and any third-party source of the personal data; and
- obtain a copy of the Personal Data undergoing processing upon the request.

6.4. **The right to verify the Data Subject's information and seek its rectification.**

The information we collect can be/become inaccurate or out-of-date (e.g., mistakes in nationality, date of birth, info on debts, economic activities). If we reveal that the Personal Data is inaccurate or the Data Subject requests us to do so, we must ensure that we correct all mistakes and update the relevant information.

6.5. **The right to restrict processing.**

6.5.1. The restriction of processing allows Data Subjects to temporarily stop the use of their information to prevent the possible harm caused by such use.

6.5.2. This right applies when the Data Subject:

- contests the accuracy of the Personal Data;
- believes that we process the Personal Data unlawfully; and
- objects against the processing and wants us not to process Personal Data while we are considering the request.

6.5.3. In the case of receiving the restriction request, we must not process Personal Data in question for any other purpose than storing it or for legal compliance purposes until the circumstances of restriction cease to exist.

6.6. **The right to withdraw the consent.** For the activities that require consent, the Data Subject can revoke their consent at any time. If the Data Subject revokes the consent, we must record the changes and must not process the Personal Data for consent-based purposes. The withdrawal of consent does not affect the lawfulness of the processing done before the withdrawal.

6.7. **The right to object against the processing.**

6.7.1. If we process the information in our legitimate interests, e.g., for direct marketing emails or for our marketing research purposes, the Data Subject can object against the processing.

6.7.2. In the case of receiving the objection request case, we must consider Data

Subject's request and, where we do not have compelling interests, stop the processing for the specified purposes. If the personal data is still to be processed for other purposes, the Privacy Manager must make sure that the database has a record that the data cannot be further processed for the objected activities.

- 6.7.3. The objection request can be refused only if the personal data in question is used for scientific/historical research or statistical purposes and was appropriately protected, i.e. by anonymization or pseudonymization techniques.

6.8. **Right to erasure/to be forgotten.**

- 6.8.1. The Data Subjects have the right to request us to erase their Personal Data if one of the following conditions are met:

- Personal Data is no longer necessary for the purposes of collection. For example, a user has provided personal data for a one-time activity, such as data validation or participation in a contest, and the purpose is already fulfilled;
- the Data Subject revokes one's consent or objects to the processing (where applicable) and there is no other legal ground for the processing; or
- we process the Personal Data unlawfully or its erasure is required by the applicable legislation of the European Union or one of the Member countries of the European Union.

- 6.8.2. Conditions, under which we have the right to refuse the erasure:

- Personal Data is processed for scientific/historical research or statistical purposes and is appropriately protected, i.e. pseudonymized or anonymized;
- Personal Data is still necessary for legal compliance (e.g., financial or labor laws compliance).

- 6.8.3. Only those personal data records must be deleted that were specified in the request. If the Data Subject requests the deletion of all personal data concerning her or him, the employee must seek advice from the Privacy Manager first, to make sure all the data about the Data Subject is mapped and can be deleted.

- 6.8.4. If the User still has an account with us and requests the erasure of information necessary for maintaining the account, we must inform the User that the erasure will affect user experience or can lead to the closure of the account.

6.9. **Data portability.**

- 6.9.1. Data Subjects can ask us to transfer all the Personal Data and/or its part in a machine-readable format to a third party. This right applies in two cases:

- personal data was collected for the purpose of provision of our services (performance of the contract); or
- collected based on consent.

- 6.9.2. To determine whether one of the p.6.9.1 conditions are met, the employee must seek advice from the Privacy Manager and check the applicable legal basis in the Records of processing activities. If the answer is negative, the request can be refused by Hudson and Thames Quantitative Research, and the Privacy Manager must decide whether to comply with the request on a voluntary basis.

- 6.9.3. To comply with the request, the responsible employee must consolidate requested Personal Data and send the data in the format we are usually working with to the requested organization. The Data Subject must provide the necessary contact details of the organization.

## **7. New Data Processing Activities**

### **7.1. Notification to Privacy Manager**

- 7.1.1. Before introducing any new activity that involves the processing of personal data, an employee responsible for its implementation must inform the Privacy Manager.
- 7.1.2. Upon receiving information about a new activity, Privacy Manager must:
- determine whether the data processing impact assessment (DPIA) and/or the consultation with the Supervisory Authority is necessary. If the answer is positive, the Privacy Manager must make sure the DPIA is conducted and/or the Supervisory Authority is consulted in accordance with the requirements of this Section and Data Protection Laws;
  - determine the legal basis for the processing and, where necessary, take further action for its fixation;
  - make sure the processing activity is done in accordance with this Policy, other Hudson and Thames Quantitative Research's policies, as well as the Data Protection Laws;
  - add the processing activity to the Records of processing activities;
  - amend the privacy information statements and, where necessary, inform the concerned Data Subject accordingly.

### **7.2. Data Processing Impact Assessment**

- 7.2.1. To make sure that our current or prospective processing activities do not/will not violate the Data Subjects' rights, Hudson and Thames Quantitative Research must, where required by Data Protection Laws, conduct the Data Processing Impact Assessment (DPIA), a risk-based assessment of the processing and search for the measures to mitigate the risks. The Privacy Manager must make sure the DPIA is conducted in accordance with this Section.
- 7.2.2. The Privacy Manager, where necessary, involving the competent employees and/or external advisors, must conduct a DPIA if at least one of the following conditions are met:
- the processing involves the use of new technologies, such as the Artificial Intelligence, use of connected and autonomous devices, etc. that creates certain legal, economic or similar effects to the Data Subject;
  - we systematically assess and evaluate personal aspects of the Data Subjects based on automated profiling, assigning the personal score/rate, and create legal or similar effects for the Data Subject by this activity;
  - we process on a large scale sensitive data, which includes Personal Data relating to criminal convictions and offences, the data about vulnerable data

subjects, the personal data revealing racial or ethnic origin, political opinions, religious or philosophical beliefs, or trade union membership, and the processing of genetic data, biometric data for the purpose of uniquely identifying a natural person, data concerning health or data concerning a natural person's sex life or sexual orientation;

- we collect or process Personal Data from a publicly accessible area or public sources on a large scale, or combine or match two different data sets; and
- the Supervisory Authority in its public list requires conducting a DPIA for a certain type of activity we are involved in. The list of processing activities requiring conducting DPIA can be found on the website of each Supervisory Authority.

7.2.3. The assessment shall contain at least the following details:

- a systematic description of the processing operations and the purposes of the processing, including, where applicable, the legitimate interest pursued by us. The description must include the envisaged data categories and data subjects concerned, the scale of processing activities, such as its frequency, volume, envisaged number of records, etc.; recipients of the data, retention periods and, where applicable, international transfers;
- an assessment of the necessity and proportionality of the processing operations in relation to the purposes. The DPIA must explain whether the activity is necessary for the purpose and whether the purpose can be achieved by less intrusive methods;
- an assessment of the risks to the rights and freedoms of data subjects, including the rights of Data Subjects regarding their Personal Data.
- The examples of risks are the processing which could lead to physical, material or non-material damage, in particular: where the processing may give rise to discrimination, identity theft or fraud, financial loss, damage to the reputation, loss of confidentiality of personal data protected by professional secrecy, unauthorized reversal of pseudonymization, or any other significant economic or social disadvantage; where data subjects might be deprived of their rights and freedoms or prevented from exercising control over their personal data; where personal data are processed which reveal racial or ethnic origin, political opinions, religion or philosophical beliefs, trade union membership, and the processing of genetic data, data concerning health or data concerning sex life or criminal convictions and offences or related security measures; where personal aspects are evaluated, in particular analyzing or predicting aspects concerning performance at work, economic situation, health, personal preferences or interests, reliability or behavior, location or movements, in order to create or use personal profiles; where personal data of vulnerable natural persons, in particular of children, are processed; or where processing involves a large amount of personal data and affects a large number of data subjects; and
- the measures to address the risks, including safeguards, security measures, and mechanisms to ensure the protection of personal data and to

demonstrate compliance with this Regulation.

- 7.2.4. Where the DPIA did not provide how to effectively address the risks, the Privacy Manager must initiate the consultation with the competent Supervisory Authority to receive help with searching for the solution. In this case, Hudson and Thames Quantitative Research must not conduct the activity before the Supervisory Authority approves the processing activity in question.

## 8. Data Retention

### 8.1. **General Rule.**

- 8.1.1. The Privacy Manager must make sure that Hudson and Thames Quantitative Research clearly defined the data storage periods and/or criteria for determining the storage periods for each processing activity it has. The periods for each processing activity must be specified in the Records of processing activities.
- 8.1.2. Each department within Hudson and Thames Quantitative Research must comply with the data storage periods in accordance with the retention schedule provided in Records of processing activities. The Privacy Manager must supervise each department and make sure they comply with this requirement.
- 8.1.3. After the storage period ends, the personal data must be removed from the disposal of the department responsible for the processing or, in cases where the data is not needed for any other purposes, destroyed completely, including from back-up copies and other media.
- 8.1.4. Whenever the storage period for a processing activity has ended, but the personal data processed is necessary for other processing purposes, the department manager must make sure that the personal data is not used for the ceased processing activity, and the responsible employees do not have the access to it unless required for any other activity.

### 8.2. **Exemptions.** The rules specified in Subsection 8.1 have the following exceptions:

- 8.2.1. **Business needs.** Data retention periods can be prolonged, but no longer than 60 days, in the case that the data deletion will interrupt or harm our ongoing business. The Privacy Manager must approve any unforeseen prolongation;
- 8.2.2. **Technical impossibility.** Some information is technically impossible or disproportionally difficult to delete. For example, deletion of the information may lead to breach of system integrity, or it is impossible to delete the information from the backup copies. In such a case, the information can be further stored, subject to the approval by the Privacy Manager and making respective amendments to the Records of processing activities; and
- 8.2.3. **Anonymization.** The Personal Data can be further processed for any purposes (e.g., marketing) if we fully anonymize these data after the retention period is expired. This means that all personal identifiers and connections to them will be deleted from the data. To consider Personal Data anonymous, it must be

impossible to reidentify the Data Subject from the data set.

## 9. Security

- 9.1. Each department within Hudson and Thames Quantitative Research shall take all appropriate technical and organizational measures that protect against unauthorized, unlawful, and/or accidental access, destruction, modification, blocking, copying, distribution, as well as from other illegal actions of unauthorized persons regarding the personal data under their responsibility.
- 9.2. The employee responsible for the supervision after the security of personal data within Hudson and Thames Quantitative Research shall be IT specialist. This person implements the guidelines and other specifications on data protection and information security in his area of responsibility. He/she advises Hudson and Thames Quantitative Research management on the planning and implementation of information security in Hudson and Thames Quantitative Research, and must be involved in all projects at an early stage in order to take security-related aspects into account as early as the planning phase.

## 10. Data Breach Response Procedure

- 10.1. **Response Team.**
  - 10.1.1. In case of revealing the Data Breach, CEO of Hudson and Thames Quantitative Research shall urgently form the Data Breach Response Team (the “**Response Team**”), which will handle the Data Breach, notify the appropriate persons, and mitigate its risks.
  - 10.1.2. The Response Team must be a multi-disciplinary group headed by CEO of Hudson and Thames Quantitative Research and comprised of the Privacy Manager, privacy laws specialist (whether internal or external), and knowledgeable and skilled information security specialists within Hudson and Thames Quantitative Research or outsourcing professionals, if necessary. The team must ensure that all employees and engaged contractors/processors adhere to this Policy and provide an immediate, effective, and skillful response to any suspected/alleged or actual Data Breach affecting Hudson and Thames Quantitative Research.
  - 10.1.3. The potential members of the Response Team must be prepared to respond to a Data Breach. The Response Team shall perform all the responsibilities of Hudson and Thames Quantitative Research mentioned in this Policy. The duties of the Response Team are:
    - to communicate the Data Breach to the competent Supervisory Authority(-ies);
    - in case of high risk to the rights and freedoms of Data Subjects, to communicate the Data Breach to the Data Subject;

- if Hudson and Thames Quantitative Research obtain data from any third party as a processor, and a Data Breach involves obtained data, to inform the third parties about the Data Breach;
  - to communicate Hudson and Thames Quantitative Research's contractors or any other third parties that process the Personal Data involved in the Data Breach; and
  - to take all appropriate technical and organizational measures to cease the Data Breach and mitigate its consequences;
  - to record the fact of the Data Breach in the Records of processing activities and file an internal data breach report that describes the event.
- 10.1.4. The Response Team shall perform its duties until all the necessary measures required by this Policy are taken.
- 10.2. **Notification to Supervisory Authority.**
- 10.2.1. Hudson and Thames Quantitative Research shall inform the Competent Supervisory Authority about the Data Breach without undue delay and, where it is possible, not later than 72 hours after having become aware of the Data Breach.
- 10.2.2. The Competent Supervisory Authority shall be determined by the residence of the Data Subjects, whose information was involved in the Data Breach. If the Data Breach concerns the Personal Data of Data Subjects from more than one country, Hudson and Thames Quantitative Research shall inform all Competent Supervisory Authorities.
- 10.2.3. To address the notification to the authority, the Response Team should use Annex 1 to this Policy. Annex 1 contains all the necessary contact information of the EU supervisory authorities. If the Data Breach concerns Data Subjects from other than the EU countries, the Response Team shall ask a competent privacy specialist for advice.
- 10.2.4. The notification to the Competent Supervisory Authority shall contain, at least, following information:
- **the nature of the Data Breach** including where possible, the categories and an approximate number of Data Subjects and Personal Data records concerned;
  - the name and contact details of the **Response Team, Privacy Manager or, if not applicable, of the CEO**;
  - the likely consequences of the Data Breach. Explain Hudson and Thames Quantitative Research's point of view on the purposes and possible further risks of the Data Breach. E.g., the Personal Data may be stolen for the further **sale, fraud activities or blackmailing the concerned Data Subjects**; and
  - **the measures taken or proposed** to be taken by Hudson and Thames Quantitative Research to address the Data Breach, including, where appropriate, measures to mitigate its possible adverse effects.
- 10.2.5. To file a notification, the Response Team should use Hudson and Thames Quantitative Research's Data Breach Notification Form to the Supervisory

Authority.

10.3. **Notifications to Data Subjects.**

10.3.1. When the Data Breach is likely to result in a high risk to the rights and freedoms of Data Subjects (e.g., stealing of funds, assets, proprietary information), we must also communicate the Data Breach to the concerned Data Subjects without undue delay. The Privacy Manager must determine if there is a high risk based on the risk factors specified in Subsection 7.2.3 of this Policy.

10.3.2. The notification shall contain the following information:

- description of the Data Breach – what happened and what led to the Data Breach, such as **a security breach, employee's negligence, error in the system work**. If the Response Team decided not to disclose the causes of the Data Breach, then this clause must not be mentioned;
- the measures taken by Hudson and Thames Quantitative Research regarding the Data Breach, including **security measures, internal investigations, and supervisory authority notice**;
- recommendations for the concerned Data Subjects how to mitigate risks and possible consequences, such as **guidelines on how to restore access to an account, preventing measures (change of a password)**; and
- the contact information of the Response Team or one of its members.

10.3.3. The notification to the Data Subjects should be carried out by the **email letter** or, where it is impossible to use the email, by other available means of communication.

10.3.4. **Exemptions.** We do not have to send the notification to the Data Subjects if any of the following conditions are met:

- Hudson and Thames Quantitative Research has implemented appropriate technical and organizational protection measures, and those measures were applied to the Personal Data affected by the Data Breach, in particular, those that leave the Personal Data inaccessible to any person who is not authorized to access it, such as encryption;
- Hudson and Thames Quantitative Research has taken subsequent measures which ensure that the high risk to the rights and freedoms of Data Subjects referred to in this section is no longer likely to materialize; or
- it would involve a disproportionate effort to communicate with every concerned Data Subject. In such a case, there shall instead be a public communication or similar measure whereby the Data Subjects are informed in an equally effective manner.

In the case we apply one of the exemptions, we **must document** the circumstances, reason for not informing, and actions taken to meet one of the exemptions.

10.4. **Communication with Third Parties.**

10.4.1. In the case a Data Breach concerns the Personal Data shared with us or processed by us on behalf of a Third Party, we must also notify the Third Party

about it within 24 hours. If we process the Personal Data as a Data Processor, the notification of the Third Party does not exempt us from the duty to mitigate the Data Breach consequences, but we must not inform the Competent Supervisory Authority and Data Subjects.

10.4.2. In case of receiving the notification about the Data Breach from the Data Processor or other Third Parties that have access to the Personal Data, CEO of Hudson and Thames Quantitative Research shall, in accordance with this Section:

- form the Response Team;
- request the Third Party to send the information mentioned in Subsections 10.2-3 of this Policy;
- where necessary, inform the Competent Supervisory Authority(-ies) and Data Subjects; and
- perform other steps of the Data Breach response procedure.
